[Main differences between V11.4 and V11.4.1](#)

This version is almost the same as the V11.4 one. It corrects these two anomalies:

- It is now possible again to have a maneuver (impulsive or continuous one) at the initial date (or near of it).
- The comment included in the header of ephemeris/events files for the **DATE** parameter is correctly updated, taking into account the right time scale.
